STROKE OF APOPLEXY

WHILE OUT FISHING

Seabreeze, July 3.—While fishing on the Central bridge at an early hour, Charles Ormond was struck with apoplexy and now lies at the Seabreeze sanitarium with little hope of recovery.

Mr. Ormond came here from Atlanta, Ga., last winter, and has been living in the Kittredge shack on Valley street for some time. He had been suffering with asthma and wished to live an outdoor life as much as possible, and when he first came tented a while on Major Rus-

sell's farm. He was an early fisherman, and went out last Saturday morning about 5 o'clock to cast his line. He was observed by Mr. Holland, who was busy with his boat nearby to be about as usual, and had been plying his line for some time, when he sat down as if tired, and in a short time dropped over unconscious. Mr. Holland summoned assistance; he was removed to his cottage and Dr. Bohannon was telephoned for. The doctor rendered every assistance, and Sunday morning removed him to the Seabreeze sanitarium that he might have better care.

Every effort was made to get in communication with his relatives, and at last a sister, residing in Atlanta, but who was in California on a visit, was heard from. Mr. Ormond claims to be the grandson of the founder of the town of Ormond, and the man for whom it was named.

The report from the sanitarium this morning is that Mr. Ormond's condition is improved, and there is a chance for his recovery, although he is not able to speak yet.

The world's most successful medicine for bowel complaints is Chamberlain's Colic, Cholera and Diarrhoea Remedy. It has relieved more pain and suffering and saved more lives than any other medicine in use. Invaluable for children and adults. Sold by all dealers.

WHAT MAKES FOOD DEAR

Dean Davenport of the University of Illinois has given our people warning that the day of cheap food has passed in America. What rubbish! I doubt if the State of Illinois produces today one-tenth of the food it can produce under scientific, intensive agriculture. There are 14,000,000 square miles land in this hemisphere, with an average of eight and a half persons to the square mile. The hemisphere can support in comfort and luxury 200 to the square mile.

The French buy less food per capita than other people in Europe, with a population of 163 to the square mile. Germany has 290 to the square mile; Massachusetts has 350; New York, 160; Porto Rico, 300; Connecticut, 200; New Jersey, 250. The great province of Ontario, with an area of 207,000 square miles in the best climate for man, the domestic animals, grains and fruits, has a population of eight and a half to a square mile. It can support in luxury a population of 100,000,000.

It requires four bushels and ten pounds of wheat to make a barrel of the best flour. At the present time the farmer receives \$3 for that wheat. The bran, middlings and coarse flour pay for the cost of milling and the barrel. Retail grocers here are paying \$7 a barrel for that flour—\$3 for production and \$4 for distribution. This is what makes dear food.

If we drain our swamps, dike our marshes, irrigate our arid lands, and adopt intensive, scientific agriculture there is no limit to production. Under such conditions this hemisphere can maintain in luxury two billion people. The Netherlands, with an area of 12,000 square miles, has expended nearly \$100,000,000 in dikeage, and the expenditure has proved to be a dividend-paying investment.

Our agriculture is a disgrace to our intelligence as a people. The same is true of our treatment of our coal mines. We are burning up coal for light, heat and motive power which we can obtain for one-tenth the cost by developing our water powers.—Francis Wayland Glen, in New York World.

Senator Isaac Stephenson of Wisconsin is the oldest man in the Senate, being 80 years of age.

Ten Doctors Said He Would Die

"In 1903 we wrote you regarding my husband, who was suffering from heart trouble. He was superannuated by the North Georgian Conference. Ten doctors at different times said he would die. You advised Dr. Miles' Heart Remedy and Restorative Nerve; we did as advised, and improvement was apparent from the very first. He recovered and the Conference in 1904 gave him a charge. He never felt better, although he has very heavy work and does a great deal of camp meeting work. I am so glad we took your advice and gave him the medicine, and feel that I ought to let you know of the wonderful good results from its use."

MRS. T. S. EDWARDS, Milner, Ga.

This proves what Dr. Miles' Heart Remedy will do. Get a bottle from your druggist and take it according to directions. It does not matter whether your heart is merely weak, or you have organic trouble, if it does not benefit you take the empty bottle to your druggist and get your money back.
